

WIF2003

Project Presentation 2

Guidelines & Submission Requirements

Presentation 2 — Guidelines

All Members Must Present(Recorded session)

Every group member is required to present their individual contribution in recored sessions with cam enable

Maximum Duration: 15 Minutes

15 minutes for the presentation + 5 minutes for Q&A. Time will be strictly enforced.

Assessment Criteria

Refer to the WIF2003 Project Assessment Rubric for detailed marks and grading criteria.

Presentation Content

Introduction & Structure

- Brief project introduction (team, title, modules, features)
- Ensure latest task distribution (PIC per module) is reflected in the report
- Each member presents their own assigned module and features

Demo & Code Walkthrough

- Focus on server-side scripting (MERN stack)
- Demo sequence: Registration → Login → Other features (logical order)
- Show input/output and prove database changes (CRUD)
- Highlight key code contributions

Recorded Presentation Requirements

Max Duration

Recording must not exceed 15 minutes in total.

Slide Count

Presentation slides must be exactly 10 slides — no more, no less.

Member Contribution

Each group member must clearly present and explain their individual contribution.

Project Demo

The Group Leader will conduct and narrate the live project demo with their camera enabled.

Camera On

The Group Leader must have their webcam enabled throughout the demo segment.

Submission: Project Report

Due Date: 12 June 2026 (Friday, Week 14)

- Front-End Development — UI/UX, React components, client-side routing
- Back-End Development — Node.js/Express API, server-side logic, authentication
- Database Design — Schema, collections/tables, indexes, relationships
- Unit Testing — Individual function/component tests with test cases and results
- Functional Testing — Feature-level tests verifying correct system behaviour
- Integration Testing — End-to-end API and module interaction tests
- Database Testing — CRUD verification, constraint and data integrity checks
- Screenshots of all system features (Section 2.2 of the report template)
- Task distribution table (PIC for each module) — must be current

Submission: Project Files

Source Code

- All front-end and back-end project files
- Folder structure must be clean and organised
- Include a README file with setup and run instructions

Database

- Export and include your full database dump/file
- Provide a separate file with database connection details and login credentials

Presentation

- Recorded video (max 15 min, exactly 10 slides)
- Presentation slide deck (PPTX or PDF)
- Member contribution breakdown clearly visible in slides

Testing Requirements

Unit Testing

Test individual functions and components in isolation. Document test cases, expected outputs, and actual results for each module.

Functional Testing

Verify that each system feature behaves according to the specified requirements. Cover success, failure, and edge cases.

Integration Testing

Test interactions between front-end, back-end, and database layers. Validate API endpoints and end-to-end data flow.

Database Testing

Verify CRUD operations, referential integrity, constraints, and data consistency across all collections or tables.

All test results must be documented in the report with evidence (screenshots, logs, or test output).

Peer Evaluation

Due Date: 12 June 2026 (Friday, Week 14)

- 1 Download the Peer Team Evaluation Form template from SPeCTRUM.
- 2 Complete the form, evaluating other group members honestly based on contribution.
- 3 Submit the completed form via SPeCTRUM before the deadline.
- 4 Any issues should be reported to the instructor via MS Teams chat or email.
- 5 If your project has unresolved issues, the instructor will schedule a clarification meeting.

Week 14 — Physical Presentation

Important Notice

During Week 14, the instructor will randomly call groups from each OCC tutorial section to present their work physically in class. All group members must be prepared to present.

Who is called?

Groups are selected randomly across all OCC tutorial sections. No advance notice will be given.

What to present?

A physical walkthrough of your project — features, code, and testing evidence.

Who presents?

Any or all group members may be asked to explain their individual contributions.

Be prepared

All members should have a thorough understanding of the entire project, not just their own module.

Summary & Key Deadlines

Live Presentation (MS Teams)	Scheduled slots — see SPeCTRUM
Project Report + Files	12 June 2026 (Friday, Week 14)
Recorded Presentation (10 slides, ≤ 15 min)	12 June 2026 (Friday, Week 14)
Peer Evaluation Form	12 June 2026 (Friday, Week 14)
Physical Presentation (Random, Week 14)	In-class, OCC groups selected randomly

Good luck! Prepare thoroughly and present with confidence.
